Materials

Upper NAPA STRETCH; washable, breathable and elastic, it allows total adaptability to different feet morphology, not pressing any point.

Lining Coolmax[®] Tissue 100% Breathable and 100% Dry, treated with Therapeutic Silver Treatment.

Insole On Steam 10 mm. Perforated Memory Foam with antibacterial treatment and Coolmax[®] tissue lining. Ergonomic. Great cushioning support and antistatic properties. Great capacity for quick moisture absorption and elimination.

Inner sole Antistatic.

Sole CFC-Free' P.U. injected through Direct Injection, Mono-density sole with Shock Absorber.

Characteristics

Made through Direct Injection; ultra light, cushioning Comfort. One piece molded shoe: flexible soles adapt to the ground absorbing shocks and pressure. Anti-slipping Soles with insulating properties and hydrocarbon resistance. Easy maintenance (washing machine use, quick natural dry). Analgesic action working to increasing blood flow and circulation, easing muscle tension.

Supreme comfort offers long-lasting comfort and a versatile and adaptable 'glove' fit that can mould around swollen or problem feet.

Coolmax[®] technical tissue stands out for its great capacity to absorb moisture very quick being greatly breathable, and evacuating the heat as it is generated with the extended use.

The Ion Silver treatment improves moisture loss, eliminating bad smells and achieving a thermoregulation effect, given the use of silver ion properties for antibacterial power and moisture management. In addition, this treatment has Antistatic properties; silver being best natural conductor, helps skin's nerve endings to release the generated electricity. As conductors, Silver Ions generate a Magnetic, Heals wound field improving blood circulation and reducing inflammation.
