

# NIZZA CLOG WITH BACK-STRAP

(Rotable & Replaceable)

Sizes: 35 - 49

Available Colours: ● ○

WITH OR WITHOUT PUNCHED UPPER

A light, washable and ergonomic clog, manufactured in one piece through direct injection; superior lightness and flexibility; there is no stitching or gluing between the upper and the sole. With a non-slip sole and a wide unisex form, it provides support for the foot without compression. Their ergonomic design allows for a balanced distribution of body weight. Its glossy finish that does not age is associated with a modern worker. Codeor Quality products deliver superior comfort, longer resistance and great durability.

Made according to the norm CE ISO EN 20 347 OB+E

Ultra lightweight

Wide fit sole

Highly non-slip soles

Breathable uppers

| Component | Material                                                                  | Characteristics and Benefits                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
