

Sizes: 35-47

Available colours:

Lightweight, flexible, non-slip footwear with a leather cut that gives it an elegant finish and good adaptability to the foot.

Manufactured by direct injection, (the union of the cut with the floor is fused into a whole, without the need for sewing and gluing), this gives the shoe quality and a high level of thermal comfort.

Unisex last, and with a design that facilitates a balanced plantar support.

Made according to the NORM **EN ISO 20347:2012 CÓDIGO SRC**

	Material	Properties and Benefits
