

Sizes: 36 a 47

Color disponible: ● ○

A light, flexible, washable and resistant shoe, derived from the manufacturing system using direct injection [NanoflashTechnology].

There is no stitching or gluing between the upper and sole: the sole is made in one piece. With a non-slip sole and unisex upper, it provides support for the foot without compression. The raised instep allows the weight of the body to be distributed evenly. Highly upper breathable with thermal regulator properties. The shoe is tied up using laces.

Made according to the **Norm EN ISO 20347:2012** for the level of protection **OB+SRC+E**

Component	Material	Properties and Benefits
UPPER	Fabric MACAN + PU Nanoflash Technology	<ul style="list-style-type: none"> • Breathable. • No stitching [one piece]. • Washable in the washing machine 40°C. • Does not age or split and highly resistant to tearing and chemical products • High durability. • Easy to clean.
