**Black S3** is a safety sport model with premium properties:

- Manufactured by direct injection, the upper and the sole are fused together in one piece.

There is no stitching or gluing.

- The sole, **single-density PU** brings to the shoe light, flexibility, shock absorption and resistance to hydrocarbons.

- The upper, made of **On Dura** textile offers resistance, breathability and waterproof.

- The front and the back side of the shoe are reinforced with **1.7 mm On Suede**.

- Incorporates an **anti-perforation insole** made of a flexible and light textile. A **safety toe cap (200 J)** of polycarbonate and an insole **with antibacterial treatment**.
